Summary

Enthusiastic and detail-oriented BCA student with a strong foundation in web development and database management. Proficient in front-end and back-end technologies, eager to apply technical skills in real-world projects. Passionate about problem-solving and continuous learning in the field of software development.

Skills

- Programming Languages: HTML, CSS, JavaScript, Python

- Frameworks & Libraries: Bootstrap

- Database Management: MySQL

- Tools & Platforms: GitHub, OpenWeatherMap API, Tkinter

Education

Bachelor of Computer Applications (BCA)

Pune University

Science Stream

Projects

Weather & Map Viewer

- Developed a Python-based weather and map viewer using Tkinter, TkinterMapView, and OpenWeatherMap API.

- Improved accuracy and reduced response time by optimizing API requests and data retrieval.

Weather Prediction Model

- Built a weather prediction model using OpenWeatherMap API and linear regression in Python.

- Integrated Gemini API to enhance weather forecasting accuracy.

Interactive Portfolio Website

- Designed and developed a dark-themed, interactive portfolio using HTML, CSS, and JavaScript.

- Implemented animations and hover effects for enhanced user experience.

Experience

Freelance Web Developer (Ongoing)

- Created responsive and dynamic websites using HTML, CSS, JavaScript, and Bootstrap.

- Integrated APIs and optimized site performance.

Additional Information

- GitHub: [Your GitHub Link]

- Portfolio: [Your Portfolio Link]

- Open to internships and freelance opportunities in web development and software engineering.
